Best Old-School Hash

OUR HASH:

Lebanese Hash

is beautiful with its blonde interior and rich, darkened exterior. Expect a fresh, flower-forward taste and a potent high from these traditional bricks of hashish.

Moroccan Hash

starts with potent kief that's decarboxylated and then hand-rolled into one-gram balls. The resulting hash is deep and pungent with the musky flavor profile one would expect from classic hash.

HOW TO SMOKE:

Bowl Topper: Traditional hashish is not full-melt, so it cannot be dabbed. Instead, break it into small pieces and add it to flower on top of your bowl, or smoke our hash by itself in a pipe.

Hash Hole: Our Moroccan can be rolled into a worm that's perfect for hash-hole joints, or our Lebanese can be crumbled and mixed with the flower in a joint for extra potency.

Under Glass: The classic way of smoking hashish is to put it on a pin, light it on fire, wait for the flame to go out, and then to trap the smoke under a glass before inhaling. Google it!
