

MANUFACTURING IN THE ORIGINAL HASH TRADITION

The Greenery Hash Factory hand-crafts solvent-free cannabis extracts for an authentic hash experience.

Our extraction methods concentrate cannabis's richest features to **enhance potency without introducing solvents** that sacrifice the plant's native chemical structure. The result is a cleaner concentrate that naturally highlights the terpene and cannabinoid profiles inherent to quality craft cannabis.

Traditional Hash »

Lebanese Hash, Moroccan Hash, Hash Joints

Contemporary Hash »

Bubble Hash, Infused Flower

OUR HASH:

Lebanese Hash

Lebanese Hash is beautiful with its blonde interior and rich, darkened exterior. Expect a fresh, flower-forward taste, and a potent hash high from our traditional Lebanese Hash.

Moroccan Hash

Moroccan Hash starts with potent kief that's decarboxylated and then carefully rolled into one-gram balls by hand. The resulting hash is deep and pungent with the relaxing high one would expect from classic hash.

Hash Joint

The Hash Joint is filled with a 50/50 blend of traditional hash and strain specific flower in a one gram pre-roll.

Infused Flower *(Commonly referred to as Caviar)*

A trifecta of potency! A bud of premium flower is coated in extracted Cannabis Oil and then battered generously in our potent Kief. We never thin the Cannabis Oil with alcohol or solvents, and the resulting potency and flavor is astounding. *Also available in a 1 gram pre-roll.*

Bubble Hash

We craft full-spectrum, flavor-rich Bubble Hash to be pure and potent. Solventless, ice-water processed.
